## STATISTICS.

## NEW METHOD OF REGISTRATION OF INDIAN TRADE STATISTICS.

Dated the 27th March 1911.

## RESOLUTION.

In paragraphs 2 and 3 of the Resolution of the Government of India in this Department, No. 1650—1660-3, dated the 2nd March 1906, it was announced that, as a result of the recommendations contained in the Report of the Committee on Indian Trade Statistics, which was appointed in 1905, it had been decided to introduce, as an experimental measure, a new system for the registration of the statistics relating to the foreign seaborne trade of India, namely, the recording of imports according to the country of consignment and of exports according to the country of final destination, as defined in paragraphs 15 and 24, respectively, of the Report of the Committee on Indian Trade Statistics. It was explained that the system already in force, under which the import statistics were recorded according to the country of shipment and the export statistics according to the country containing the port of discharge as declared by the exporter, would continue to be maintained; that the figures compiled under both systems would be published concurrently for a period of five years; and that if the new system proved satisfactory in actual practice, it could be definitely adopted and the old system abandoned.

2. The first issue of the statistics recorded under the new system of registration above described appeared as a Supplement to the Annual Statement of the Foreign Seaborne Trade and Navigation of British India for the year 1907-1908. The second issue, which contained the statistics relating to the year 1908-1909, was published in September 1910; and the third issue, for the year 1909-1910, will be published shortly. The statistics for the current year 1910-1911 have also been recorded, and will be published in due course, under both systems.

3. The Government of India are satisfied, from a comparison of the figures already recorded under the two systems, that the results obtained under the new system, which has also been definitely adopted in the Foreign Trade Accounts of the United Kingdom from 1909, are superior to those obtained under the old system. They are also satisfied that the existence of comparative figures for four years obviates any serious break in the continuity of the statistics. They have therefore decided that after the close of the current official year the method of registration of Indian trade statistics according to the countries of consignment and of final destination shall be permanently adopted, and the old system of registration finally abandoned.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 6th April 1911, based on the Indian Daily Weather Reports of the period.**

1. Another depression from Persia caused the winter rains in northwest India to continue to the unusually late date of the 3rd of April. The depression moved slowly eastwards giving a few light falls in the extreme north on the 30th March, and moderately heavy precipitation on the 31st; but on the 1st of April its activity was greatly diminished. On the 2nd of April it revived and gave nearly general rain in the submontane districts between Simla and Ranikhet and a few falls in Kashmir, and on the 4th it had disappeared. Rainfall due to ordinary hot weather conditions began in northeast India on the 1st of April, extended into north Burma on the 2nd, and continued until the close of the week; but in the south of the Peninsula, owing to northerly dry winds, the customary afternoon thunderstorms were much less frequent than usual.

2. Temperature was nowhere very far removed from normal at the beginning of the week, but on the 3rd cool conditions extended over the northwest and temperature fell somewhat in the northeast also. During the remainder of the week temperature was appreciably below normal over almost the whole of northern India. In the Peninsula and Burma the temperature conditions were fairly normal.

3. *Burma.*—Light scattered falls of rain were reported in Upper Burma on the 2nd, 3rd, 4th and 5th.

*Northeast India, including Orissa.*—From the 1st to the 5th rainfall was fairly general in Assam, and varied from fairly general to a few falls in Eastern Bengal. In the remainder of the division practically no rainfall occurred.

*The United Provinces, Central India and the Central Provinces.*—Light rain fell in the submontane districts of the north United Provinces on the 2nd, but no other precipitation of importance was reported during the week.

*Northwest India.*—Light precipitation began in Kashmir, the north Punjab and the North-West Frontier Province on the 30th March, and was followed by fairly general and moderately heavy precipitation on the 31st. On the 1st of April light scattered falls in Kashmir and the North-West Frontier Province were reported, and on the 2nd a few falls occurred in Kashmir and the east Punjab.

*The Peninsula.*—Thunderstorms gave rain at Trivandrum on the 30th of March and at Gopalpur on the 4th of April but no other appreciable falls were reported.

4. The largest amounts of precipitation during the week were as follows:—

March 31st. Minimarg 2½ feet of snow, Srinagar 1·88" of rain and Murree 1·26".

April 1st. Dhubri 2·62" of rain and Minimarg 2 feet of snow.

„ 3rd. Sibsagar 1·27", Gauhati 1·28", Silchar 2·50", Cherrapunji 4·59" and Mymensingh 3·24".

„ 4th. Silchar 1·95" and Cherrapunji 2·11".

5. Precipitation during the week was markedly above the normal in Kashmir, Eastern Bengal and Assam, and Upper Burma, but elsewhere did not depart to any important extent from normal. For the period 2nd December to 6th April it was in large excess in the United Provinces, the Punjab, Kashmir, the North-West Frontier Province, Sind; Rajputana West and Gujarat; in slight to moderate excess in Assam, Baluchistan, Central India East, Berar and Mysore; nearly normal in Upper Burma, Eastern Bengal, Orissa and Rajputana East; and in defect elsewhere.

### Season and Crop Prospects for the week ending Saturday, 1st April 1911.

**Burma.**—Slight rain fell chiefly in the northern section. Sowing and transplanting of spring rice and plucking of tobacco are in progress. Reaping of miscellaneous island and other crops and clearing of hill sides for cultivation continue. Standing crops are in good condition. The price of unhusked rice has risen considerably at Sandoway and Pegu and is mostly above normal.

**Eastern Bengal and Assam.**—The weather was cloudy and warm. Moderately heavy showers have fallen in all districts except Malda. Speedy completion of the sowing of jute and rice crops is now assured. Harvesting of sugarcane is nearly complete. Later cuttings have given better results than the earlier. Harvesting of *ganja* in Rajshahi is finished and the outturn is reported poor. The average price of common rice shows a tendency to fall. Very little Burma rice is being imported. Cattle disease prevails in Dacca, Chittagong, Noakhali, Sylhet, Goalpara, Darrang and the Naga Hills.

**Bengal.**—Rain fell all over the Province except in Birbhum, Gaya and Singhbhum. The fall was rather heavy in Howrah, Jessore, Khulna, Shahabad, Purnea, Darjeeling and Cooch Behar and light elsewhere. The recent rainfall has facilitated ploughing operations. **Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 13th April 1911, based on the Indian Daily Weather Reports of the period.**

1. A disturbance in the extreme north gave rain at the beginning of the week in the North-West Frontier Province and snow in Kashmir. The precipitation was followed by a fairly well marked cool wave which passed rapidly eastward across northern India, but its influence did not last long and by the 11th temperature was approximately normal throughout the country. Maximum temperatures ranging from  $105^{\circ}$  to  $108^{\circ}$  were recorded during the week at stations in the United Provinces, the Central Provinces and the Madras Deccan.

2. Rainfall was fairly abundant in Assam, but elsewhere was confined to a few falls in Burma, the extreme north of India and the southern half of the Peninsula.

3. At the close of the week the sea was rough at Colombo and was rising in the vicinity of the Andamans and south Tenasserim; these conditions combined with a change in the direction of the winds and the commencement of rainfall in the Andamans indicated a disturbance in the south of the Bay.

4. *Burma*.—Light rain fell at Mandalay on the 6th and at Myitkyina on the 10th and 11th.

*Northeast India, including Orissa*.—Rainfall occurred in Assam every day except the 10th and there was a light fall at Narayanganj on the 6th.

*The United Provinces, Central India and the Central Provinces*.—There was no rain, and skies were cloudless throughout the week.

*Northwest India*.—Rainfall was fairly general in the North-West Frontier Province on the 7th, and a few falls of snow occurred in Kashmir on the 7th and 8th.

*The Peninsula*.—A few falls of rain occurred in Madras and Mysore, and Sholapur also reported a light fall on the 8th.

5. The largest amounts of precipitation during the week were as follows:—

April 6th. Ootacamund 1'38" and Kodaikanal 1'18".

„ 7th. Silchar 1'27".

„ 9th. Cherrapunji 3'81" and Sibsagar 1'40".

6. The precipitation of the week was above the average in Mysore and the Madras Deccan and within 20 per cent of the normal in the Bay Islands and Assam; it was more than half an inch in defect in Malabar. For the period from the 2nd December 1910 to the 13th April 1911 it was in more or less marked excess in Assam, the United Provinces, the Punjab, Kashmir, the North-West Frontier Province, Baluchistan, Sind, Rajputana West, Gujarat, Berar and Mysore; within 20 per cent of the normal in Eastern Bengal, Orissa, Rajputana East and Central India East; and in defect elsewhere.

Season and Crop Prospects for the week ending Saturday,  
8th April 1911.

**Burma.**—Slight rain fell in six northern districts and in the Northern Shan States and the Chin Hills. Clearing of hill sides for cultivation and harvesting of miscellaneous island and other crops continue. Sowing and transplanting of spring rice and plucking of tobacco are in progress. Standing crops are in good condition. The price of unhusked rice has risen slightly in Rangoon, Mergui and two other centres and has fallen slightly in Tharrawaddy, Myaungmya and one other centre. It is about normal in most places.

**Eastern Bengal and Assam.**—[Report not received.]

**Bengal.**—During the week rain fell in the Burdwan, Presidency and Orissa divisions, Birbham, Howrah and the 24-Parganas excepted, and also in Champaran, Darjeeling and Cooch Behar. The fall was rather heavy in Jessore, Khulna, Nadia and Bankura and light elsewhere. Standing crops have been damaged to some extent by hailstorm in parts of Champaran, Khulna and Murshidabad. Planting of sugarcane and harvesting of spring crops are in progress. Preparation of lands for the next season's crops continues but rain is wanted for the purpose in Burdwan and the 24-Parganas. The newly planted sugarcane and vegetables are doing well in Orissa. The price of common rice has risen in Murshidabad, Jessore, Saran, Champaran and Angul and has fallen in Burdwan, Khulna, Darbhanga and Cuttack. Cattle disease is reported from Burdwan, Howrah, Shahabad, Monghyr, the Sonthal Parganas, Puri, Sambalpur, Hazaribagh, Palamau and Manbhum. The supply of fodder and water is sufficient throughout the Province except in parts of Midnapore and the Sonthal Parganas.
